

In a Good Light

Autumn's crisp weather is an invitation to spend more time indoors. And making your house a cozy home is easy with the right lighting techniques. Lighting enhancements with Philips AmbientLED bulbs refresh rooms, revitalize moods, and create an enchanting experience that will warm you and your family throughout the season. See all that Philips AmbientLED lighting can do.

What's Possible—and Practical

with Amy Lau, interior designer and author of *Expressive Modern:* The Interiors of Amy Lau

UP TO THE TASK

Not all reading lamps are created equal. Select a reading lamp with an adjustable arm and focused light, and reduce eye strain by choosing an LED

lamp. The ideal height for a reading lamp is approximately 26 to 32 inches. When deciding on lampshades, remember that translucent lampshades are better suited for task lighting, and dark shades are best used for their decorative effect.

SOFTEN YOUR SPACE

Install dimmers to soften the light across all of your space. Then it's possible to create a gentle glow for your next get-together, add elegance to everyday dinners, and lower the lights for a family movie night. The best part? You will also save on energy costs by not having your lights on at full brightness.

Experience Energy Efficiency and Ease of Use

Improve energy-efficiency in your home with the advanced solid state lighting technology of Philips AmbientLED bulbs. Designed in traditional bulb shapes, Philips AmbientLED bulbs are easy to use, fit easily into existing fixtures, and provide high-quality white light.

With contemporary designs and several dimmable options available, Philips AmbientLED bulbs offer a wide range of solutions for your household. Switching to higher efficiency LED lighting can help reduce your electric bill, preserve our environment, and create the perfect lighting for your home.
