Inspired by the Sea and Sky

Colors inspired by the sea and sky inspired designer Amy Lau of [Amy Lau Design](#) in this vibrant, fun bedroom design. The blues of the nightstand drawers in this bedroom are suggestive of the ocean's waves and blue sky. The moiré pattern on the headboard is reminiscent of swells lapping on a beach, notes Lau. The delicate striped pattern on the pillows and lampshade introduce a complementary shade to the room, while the grass cloth wallpaper, hand knotted wool rug and mohair throw add luxury to the space.
